THE MAINE CAMPUS

Vol. IX

ORONO, MAINE, OCTOBER 22, 1907

No. 4

BROWN-MAINE.

Brown defeated Maine at Providence, Saturday, Oct. 12, 40 to 0, scoring 29 points in the first half. Brown showed her best form of the season and displayed a powerful offence, MacDonald, Regnier and Mayhew making long gains.

The game started with Brown kicking off to Maine, who lost the ball on a fumble. From here, Regnier and MacDonald carried the ball over in a series of rushes. After the next kick-off, Maine tried a forward pass, but Dennie intercepted it. Mayhew made 15 yards around end and MacDonald went through center for 25 more and a touch-down.

MacDonald added one more score shortly after the next kickoff. Pryor took a forward pass for 25 yards. Dennie on a quarterback run circled the end for the fourth touchdown.

In the second half Maine held Brown for a while, but Mayhew succeeded in circling the end for long runs which resulted in touchdowns. During the last few minutes of play Maine by straight line plays made her first downs, but could not get the ball into the Brown territory. Bearce tried a goal from placement from the 40-yard line, but it was blocked. Dennie, at quarter for Brown, played a great game.

BROWN U. of M.

Score, Brown 40, Maine 0. Touchdowns, MacDonald 4, Dennie, Mayhew 2. Goals from touchdown, Hazard. Umpire, Murphy of Harvard. Referee, Burleigh of Exeter. Head linesman, Hunt. Time, 25 and 20m periods.

BAR HARBOR Y. M. C. A. — MAINE 2nd.

Saturday, Oct. 12, the Y. M. C. A. eleven of Bar Harbor defeated the Maine 2nd team 6 to 0. Maine did not make consistent gains through the Bar Harbor line, and her punting was a failure generally. Both teams tried the forward pass unsuccessfully, and on one of these the only touchdown of the game was made, when Gerrish tried it, landing the ball in the hands of Cleaves, Bar Harbor's left half. Cleaves planted a touchdown after a long run. The play came at the end of the first half. The second half was never dangerous for either side.

The line-up:

Y. M. C. A.		MAINE 2d
Carter.....	1 e	Kurnan, Cruikshank
Wood.....	1 f	Houghton
McFarland.....	1 g	Cummings, Tarball

Score, B. H. Y. M. C. A. 6, Maine 2d 0. Officials, Carter, Dunham, Beane, Halves, 15 and 10 minutes.

FRESHMAN-SOPHOMORE BASEBALL.

The last baseball game of the Freshman-Sophomore series was played Friday afternoon, Oct. 11, the Freshmen winning by a score of 5 to 2. Because of the close score, 1 to 0, in the first game, the Freshmen were not so certain of the outcome as then. Ryan proved more of a puzzle to the Sophomores than before, and they only succeeded in finding him for two safe hits. Libby and Keyes for the Sophomores also did good work. Besides Ryan, Richardson was the star of the freshmen. The freshman battery

makes the 'varsity outlook good for next spring.

✻ ✻ ✻
MASS MEETING.

Wednesday evening, October 16, probably the most enthusiastic mass meeting in the history of this college was held in the chapel. It marked the awakening of the "Maine Spirit" to such a degree, that it caused one of the faculty to say that it was by far the most enthusiastic meeting he had ever witnessed. The playing of the band was excellent and caused much favorable comment, and the students' appreciation for its fine work was shown by their many applause.

After a few selections by the band, "Buster" Boyle, '08, who acted as cheer leader, led the cheering for Maine and the team, which was long, loud and hearty. "Buster" did a good job. Mr. Kendrigan, President of the Athletic Association, called the meeting to order. Although his remarks were short they were well directed. He spoke of the various classes and what Maine spirit meant to them and the classes that had gone before. The first speaker that Mr. Kendrigan called on, was Prof. R. K. Jones, the representative of the faculty in athletics. Mr. Jones was given a very good reception and his words were appreciated by the students. He urged all the students that could possibly go, to plan to go on the special train. Mr. McCoy, the coach of our football team was the next speaker and the applause he received was an audible measure of his great popularity. He urged the students to stand back of the team, to go to Portland and support the team. He then spoke very highly of the condition of the team. After a selection from the band Captain Brown was called on. He spoke briefly, but strongly urged the fellows to go to Portland. Subscription papers were passed around and it was soon found that over three hundred had signed, which guaranteed the running of the special train. Chase, '08, spoke next, first on the "Maine Spirit" and then urged the fellows to stand behind the team at Portland, whether they won or lost. Pike, '09, the manager of the baseball team, summed up in a few words, the situation nicely and President Kendrigan mentioned the band. A spontaneous movement of some hundreds of students towards their cash pockets, in a few minutes assured about twenty-five band men of the trip.

The students were given an unexpected treat when Mr. Kendrigan called on "Steve" Farrell. It isn't often that the students get a chance to hear "Steve" and when they do, they always make the most of it. His welcome was no less than that given to Coach McCoy. He spoke very briefly on the team and the coming game, and said he hoped to see them all down to the game.
That ended the first mass meeting of this

year, and the students arose, and marched out two abreast, singing, whistling and shouting for M-A-I-N-E.

PHI ETA KAPPA HOUSE.

Work on the new Phi Eta Kappa House was begun last week, it being the second fraternity lodge to be begun this year at the university. The house will be erected on the pretty site between the Kappa Sigma and the Mt. Vernon houses. The work will be rushed so that the structure will be closed before the cold sets in, and will be ready for occupancy by Easter time.

W. E. Manser, the Bangor architect, drew the plans. D. C. Norton has charge of the excavating and foundation. The contract for the superstructure has not as yet been let.

The main house is to be 35 by 65, and a wing is 35 feet deep and 31 feet wide. It will be a two and a half story structure, with several attractive dormer windows.

The front entrance as provided in the plans has large glass doors, which open into a spacious reception hall. This hall is to be 22 by 35. To the left of the reception hall, as one enters, is the parlor. This room measures 15 by 20 feet and has a large open fireplace. On the right of the reception hall and directly opposite the parlor, a music room, 9 by 15 feet, is planned. The staircase is directly in front of the entrance, in the center of the hall. Behind the front parlor is another one, 13 by 20 feet. This room also contains an open fireplace. In the front corner on the same side as the music room, is a study room. On the same side is the matron's room and guests' room, with sleeping apartments and bath rooms connected. These rooms are in the wing of the house. Opening out of the reception hall is the dining room, 18 by 25 feet. The serving room and china closet are at the right. In the rear are two bedrooms.

The basement of the main part has a bath and two toilet rooms. The remainder will be used for storerooms. In the wing is the kitchen, 18 by 25 feet, from which opens off a storeroom,

which in turn is connected with a storage room. The next is another serving room. The laundry is situated in the back corner.

On the second floor are two large corridors, running at right angles to each other. A smoking room, 12 by 15 feet, occupies the center, and looks out upon a balcony. There are two study rooms on each side in front. Four more study rooms face the back in the main part. A telephone booth is placed behind the stairs. In the wing are three study rooms with sleeping apartments connected, and a toilet room.

The top floor, when finished, will contain four study rooms and a large sleeping room on the south side. On the north side a chapter hall is to be built.

A large porch will run about half the length of the house in front. The first floor will be of clapboard, and the second of shingles. The fraternity colors are green and white, which color scheme will be followed as much as possible in the decorating.

The general plan of the house is both practical and tasty. It will be another beautiful addition to the fraternity houses now at the University. R. S. Devereux, '07, is in charge of the work, and it is mainly through his efforts that the house is being built.

Phi Eta Kappa is a local fraternity which was founded at the University in the fall of 1906. Great credit is due them for their enterprise in the completion of plans for a home.

Samuel T. Dana, who is connected with the United States forest service, was at the University recently, while on a trip through Maine for the purpose of investigating the damage to trees caused by the white pine fungus disease. Mr. Dana called on Prof. Tower, and a short trip into the timber land of this vicinity was made.

Prof. Tower has returned to the University after an absence of a few days, which have been spent investigating the results of the forest fire of the spring of 1903. Prof. Tower went over the sections on the East Branch of the Penobscot river.

BANGOR CO-OPERATIVE PRINTING COMPANY

EDITORIALS.

“WE are beginning to wonder what insurmountable difficulty has presented itself to Colby students whereby they are obliged to occupy the rear seats at Chapel. It would be much more pleasant for the one who leads Chapel were he not obliged to face, day after day, a wide expanse of empty pews. A somewhat better impression would be made upon visitors, too, if the front seats were well filled.”

— Colby Echo.

Any “wide expanse of empty seats” would speedily bring top notch prices per seat at a University of Maine Chapel service, especially

since the new regulations went into effect. A more common spectacle at the beginning of the term was a wide row of standing Freshmen in the rear of the chapel, who could not obtain seats.

ONE of the old customs, of which we are not proud, but which recurs every year with the regularity of clock-work, is the mania for collecting newspaper clippings from the reading and newspaper room in the University library. Apparently this is done with no thought of the readers who are to come afterward; or of the fact that the periodicals are placed there for the use of the *student body*, and not one selfish individual who prefers to save his princely three cents to invest in Standard Oil securities rather than buy a whole newspaper for his own private use.

Nothing is more exasperating to the average reader than to find the most interesting parts of the daily papers full of holes, and the annoyance is increased by the pettiness of the offence.

In spite of the rumor that the price of newspapers is going up, they are not expensive as yet. The clipping habit is too small and mean, and altogether reprehensible to belong to any “Maine man;” so why not “cut it out?”

A letter from the New York City Federation of Women's Clubs, representing 30,000 women throughout the country, recently appeared on the bulletin board. The letter was one of a series sent to every college and university in the country, protesting against hazing. It suggested that hazing be prohibited by the faculty under penalty of dismissal from college, and appealed to the senior class to “abolish a custom, that when carried to the excess that has been committed, is not only a disgrace to our country, but a source of great sorrow and suffer-

and th

ing to the mothers who, in sending their children where they can receive the highest intellectual training, know that they may be subject to this great wrong."

While the practice of hazing is undoubtedly wrong in principle, it is safe to say that in very few of the larger colleges of the country does it merit the hysterical consternation with which these worthy and well intentioned ladies view it. The hazing of to-day inherits its reputation from the brutality of fifty years ago and is akin to it only in name. The well meaning but misinformed call it horrible; the most radical college man who knows what it is calls it by no stronger term than foolishness. Most certainly hazing as practised at the University of Maine to-day, cannot be called "a great wrong" or "a national disgrace."

Moreover, mothers send their children,—who by the way, are no longer children in one sense of the word,—where they may receive, not only the highest intellectual training, but also the most practical training in how to rub up against their fellowmen and keep right side up in the process; training which shows whether their morals will stand the rubbing process or will have the gilt rubbed off them. In real life, their children, for the most part, will have to submit to hazing processes in deadly earnest, beside which the cold water cure as administered by the sophomores will look childish. It is safe to assume that a surprising number could be found in college who value their freshman experiences as among the best of their college course. If the question of abolishing the practice of hazing, as it exists at Maine, were placed before all four classes, how many would condemn it as "a great wrong" or "national disgrace!" The chances are that the mollycoddling process would be most loudly deprecated, and that the freshmen would object as loudly as

any one against being packed in cotton wool.

The worthy ladies would have a subject more deserving of their attention if they would turn their powerful influence toward the suppression of some of the much less hearsay but more serious evils of college life, as for instance, the cribbing evil, which does more real harm in our colleges than any amount of the imaginary "horror" of some sophomorical foolishness.

SUMMER WORK OF ELECTRICALS.

A squad of Seniors in the electrical engineering department enlisted for summer work in the Deane Electric Company last June, and came back to college this year with some valuable experience and information bearing on the career of the embryo electrical engineer, who contemplates the Middle West as the base of his operations.

P. I. Robinson, '08, S. F. Thomas, '08, F. C. Morton, '08, B. L. Potter, '09, W. J. St. Onge, '07, J. C. Matthieu, '07, and A. J. Pennell, '07, spent the summer in the employ of this company and the last four are still engaged there. The company is young and is growing rapidly. Its factory is located in Elyria, Ohio, where a part of their work was done, the remainder being in Fulton, N. Y., and Detroit, Mich., where the company had the contract for the installation of telephone switch boards.

The company is practically entirely managed, in its construction departments, by "Maine" men. The superintendent of the plant is A. D. T. Libby, '98; the assistant superintendent is Roy W. Manson, '98; the head installer, Walter Munson, ex-'05; the chief engineer in the power board department, Roy G. Sands, '05; the head of the experimental department, E. T. Harlow, '05; and the travelling chief installer is Calvin Sweet, '05. These men have the true Maine spirit and are all anxious to help other Maine men. The company has few other college men in its employ, and for this reason the opportunities of a graduate are very good.

A strong feeling of prejudice was found to

exist among the employees of the company, who were western men, against the eastern college man. It is said that the man from the Atlantic states generally works himself above his western competitor, and for this reason he is liable to be taken into disfavor at the start. The Maine men who have gone into the employ of this company, have literally made good and the University has a large and growing representation there.

It was also found that there are many companies in the West and Middle West of moderate size, but which are growing very rapidly, and that the opportunity for a Maine man to get a good position with one of them, and to work himself up to a still better one is excellent.

THE DEBATING CLUB.

At a recent college meeting held in the Chapel, another of the University organizations, the Debating Club, was brought before the student body and started on its work for the season. In years past this organization has not received the unqualified support from the student body which should have been due it. It is true that debates were held with other colleges, but until the Sophomore class of last year received a challenge from the Bates Sophomores, no real interest was shown. Since that time however, a great change has come about, and this year the enthusiasm appears as strong as ever.

The officers of the Society this year are men who have had experience along debating lines, and the aid which they can render to the Club through the offices which they hold will be valued and appreciated. The officers elected for the present year are J. W. Gerrity, '09, Pres.; R. W. Redman, '10, Vice Pres.; J. H. Mason, '09, Sec. and Treas.; and C. C. Johnson, '10, Mgr.

Following last year's example, a debate is to be arranged between the Sophomore and Freshman classes. This will take place in about a month or just before Thanksgiving. Another debate between the Bates and Maine Sophomores is practically assured. This is eagerly antici-

pated by the Sophomores who feel confident of winning a victory this year. Besides these two minor debates, there will be an intercollegiate debate with Colby. This is the most important event of the year for the club since the college as a whole is interested in the outcome.

Radically new lines of preparation are to be adopted this year, inasmuch as many of the faculty have signified their willingness to aid the clubs in the many ways in which none but they can aid.

LAW SCHOOL NOTES.

The Senior Class held their annual election Monday, Oct., 14th. After a close and exciting contest Mr. Frank B. Burgess of Sangerville was chosen President, Mr. James Maxwell of Bangor, Vice President and Mr. Edward B. Davidson of York Village, Secretary and Treasurer. The executive committee consists of Mr. Hamilton, Chairman, Mr. Ridlon and Mr. Skillins.

The first debate of the Assembly was held Friday evening, Oct. 11th. The subject was "Resolved: that U. S. Senators should be elected by popular vote." Mr. Grady, Mr. Purinton and Mr. Skillins were affirmative speakers while Mr. Riggs, Mr. Waldron and Mr. Huntley upheld the negative side. No decision was given for either side, the judges being divided in their opinions. The debate taken as a whole was a success and argued by both sides in a way that showed careful reading and preparation. Mr. Riggs did especially well handling his side of the question in a very masterful way. Two new members were initiated into the Assembly, Mr. Arey and Mr. Brackett. As is the custom in the Assembly they were given five minutes for their initial debate. The question given them by the executive committee to argue was, which came first the egg or the hen. The question however was not decided. The assembly also held their annual election of officers. Mr. Holman was elected President, Mr. Ridlon Vice-President and Mr. Elder, Secretary and

Treasurer. Mr. Driscoll, Hamilton and Waldron were chosen to act as the executive committee for the fall term.

Mr. A. E. Anderson of Portland and Mr. C. F. Small of Caribou have returned to Bangor to resume their studies in the Law School.

Out of the 80 men that graduated from the college department of the University of Maine last year but one has registered in the Law School. There are more Bates, Bowdoin and Colby graduates in the Law School than Maine graduates, probably because those colleges give only the B. A. degree, but it is a fact none the less to be deplored. We congratulate Mr. R. L. Mitchell upon his choice of a profession and also on his wisdom in perceiving the efficiency of the University of Maine Law School.

THE WANING HARDWOOD SUPPLY.

Although the demand for hardwood lumber is greater than ever before, the annual cut to-day is a billion feet less than it was seven years ago. In this time the wholesale price of the different classes of hardwood lumber advanced from 25 to 65 per cent. The cut of oak, which in 1899 was more than half the total cut of hardwoods, has fallen off 36 per cent. Yellow poplar, which was formerly second in point of output, has fallen off 38 per cent, and elm has fallen off one-half.

The cut of softwoods is over four times that of hardwoods, yet it is doubtful if a shortage in the former would cause dismay in so many industries. The cooperage, furniture, and vehicle industries depend upon hardwood timber, and the railroads, telephone and telegraph companies, agricultural implement manufacturers, and builders use it extensively.

This leads to the question, where is the future supply of hardwoods to be found? The cut in Ohio and Indiana, which seven years ago led all other states, has fallen off one-half. Illinois, Iowa, Kentucky, Michigan, Minnesota, Missouri, New Jersey, Tennessee, Texas, West Virginia, and Wisconsin have also declined in

hardwood production. The chief centers of production now lie in the Lake States, the lower Mississippi Valley, and the Appalachian Mountains. Yet in the Lake States the presence of hardwoods is an almost certain indication of rich agricultural land, and when the hardwoods are cut the land is turned permanently to agricultural use. In Arkansas, Louisiana, and Mississippi the production of hardwoods is clearly at its extreme height, and in Missouri and Texas it has already begun to decline.

The answer to the question, therefore, would seem to lie in the Appalachian Mountains. They contain the largest body of hardwood timber left in the United States. On them grow the greatest variety of tree species anywhere to be found. Protected from fire and reckless cutting, they produce the best kinds of timber, since their soil and climate combine to make heavy stands and rapid growth. Yet much of the Appalachian forest has been so damaged in the past that it will be years before it will again reach a high state of productiveness. Twenty billion feet of hardwoods would be a conservative estimate of the annual productive capacity of the 75,000,000 acres of forest lands in the Appalachians if they were rightly managed. Until they are we can expect a shortage in hardwood timber.

Circular 116, of the Forest Service, entitled "The Waning Hardwood Supply," discusses this situation. It may be had upon application to the Forester, Forest Service, Washington, D. C.

The senior class held a meeting Wednesday noon. W. D. Trask was elected to the class executive committee, which consists of the class officers and one other person. Claude Boyle was elected college cheer leader, and he has appointed as assistants, P. I. Robinson and E. S. Towle. A class auditing committee was also chosen, consisting of A. S. Hanscom, W. D. Trask and J. P. Farnsworth.

A reception was given by Miss Colvin, Professor of History, to the members of the faculty Thursday evening, at the Mt. Vernon House.

Y. M. C. A. NOTES

Among the plans of the Y. M. C. A. this year is to continue the Bible classes which were held last year and to organize others. The work is in charge of Mr. Weston at the Phi Kappa Sigma House. It is hoped to get classes in all the fraternity houses, besides a number among the down town men. Those who were in classes last year will be in advanced classes this winter, while those who are new in the work will be in beginners' classes. The classes are to be led by members of the Y. M. C. A. who will be in a normal class under the charge of Professor Stevens.

Many new ideas were obtained at the Norfield Convention which was attended by nine delegates from the University; Chase, Johnson, Chandler, Gannett, Knight, Stover, Fortier, Leland, and Fisher. This delegation was the largest that was ever sent from the University of Maine, besides being the largest sent by a Maine college this year. It occupied two tents at the camp ground.

The convention was attended by about 200 delegates in all, coming from the eastern colleges of this country and Canada. The state of Pennsylvania was well represented and there were delegates from as far south as Washington. Harvard, Yale and Princeton all had very large delegations.

HEALTH AND HEAD.

"The college that forbids honors in athletics to those who have not attained a certain grade in scholarship should make the rule work both ways and forbid honors in scholarship until the student has attained a certain grade in athletics." So says Dr. Sargent of Harvard. This statement, striking, as it does, a new note in the discussion as to the relation between work in the class room and play in the field, is doubtless a little extreme, but it goes to show that a great deal of importance should be attached to the matter of adequate and reasonable physical training.

Dr. Sargent is upheld in this opinion by some of the foremost educators of the East, and the statement cannot be disregarded, coming as it does from such a high authority. Take note of this, then, you grinds. There is something worth while outside the narrow pale of the school room. There is something that counts, that is of value, outside the covers of books. Health is of importance as well as head. Do not neglect this. Do not think that your physical condition is of minor consideration. Take careful note of this, and heed the warning now.

—The Tech.

LOCALS.

Delta Sigma Sorority held its initiation on Monday, October 14th. The following were initiated: Helen W. Averill, '11; Florence E. Brown, '11; Imogene M. Bumps, '11; Annie H. Gilbert, '11; Frances Kelley, '11; Mildred L. Prentiss, '11; Christine M. Shaw, '09; Cora M. Shaw, '09; Bernice E. Watson, '10; E. Claire Weld, '11.

L. F. Pike has been elected editor of the *Blue Book*, with Miss Mary E. Chase as assistant editor. Every member of the freshman class has subscribed for the magazine.

J. D. Clement, '09, who was taking a B. S. course in chemistry, has left the University and is now attending Bowdoin.

ALUMNI

'93.

E. M. Timberlake is engaged as insurance manager in Indianapolis, Ind.

'95.

F. L. French is superintendent of the United Shoe Machine Co. at Mainzerlandstrasse, 147 Frankfurt a Main, Germany.

'00.

F. E. Webster is a draughtsman with the Crosby Steam Valve Co., Charlestown, Mass.

'01.

F. D. Fenderson who graduated in the first class out of the Law School, was on the campus recently, calling on friends. He is engaged in extension work with the New England Telephone and Telegraph Co., with headquarters at Portland.

Harold H. Clarke has a high position in the engineering department of the General Electric Co., Schenectady, N. Y.

'04

Mr. R. S. Averill, civil engineer, is at present engaged in construction work on the B. & A. R. R. Since graduation, Mr. Averill has also been employed on the preliminary survey of the Tobique and Cambellton R. R., and as structural draftsman with the Ft. Pitt Bridge Works, Pennsylvania. His present address is Milltown, Me.

Mr. Harold F. French, civil engineer, is now engaged on the B. & A. R. R. Mr. French has been in the employ of the J. W. Bishop Co., Boston, and was sub-foreman for the Eastern Expanded Metal Co., also of Boston. His present address is 39 Everett St., Bangor.

'05.

H. D. T. Thatcher was recently married to Miss McNamara of Orono.

'06.

A PEN IN A CLASS BY ITSELF

There's no pen that gives such all-round satisfaction as Conklin's Self-Filling Fountain Pen. It's in a distinct class by itself. *It's the College Standard.* Doesn't matter where you are—in your room, lecture hall, or on the train—you can fill it instantly by dipping in any ink-well. A slight thumb pressure on the Crescent-Filler does it. Cleaned in the same simple, easy way.

Conklin's Self-Filling Fountain Pen

"THE PEN WITH THE CRESCENT-FILLER"

has won distinction the world over. For student, professor, business man, professional man, and for the man who moves about, it is *the only pen*. No mussy dropper, nothing to screw or unscrew, no tool kit, no inky fingers. Ink flows as smoothly as a prize essay. No stops, no blots, balks or scratches.

Leading dealers handle the Conklin. If yours does not, order direct. Look for the Crescent-Filler and refuse substitutes. Prices, \$3.00, \$4.00, \$5.00 to \$15.00. Send at once for handsome new catalog.

THE CONKLIN PEN CO., 310 Manhattan Building, Toledo, Ohio.

hasn't built you as well as you'd like, suppose
you let

College Brand Clothes

begin where she left off. Fashioned to make
bad figures good, and good figures better.
Made the way you'd have 'em if you chose the
cloths and the cut, and the patterns. Just as
good as the tailor's best, and much more con-
venient, because you escape measurements, try-
ons delays and the gambling chance that the
garment will come out right. Not only for
young men, but for men who are willing to
look younger.

BOWDOIN COLLEGE

MEDICAL DEPARTMENT

The Eighty-eighth Annual Course of Lectures will begin October 24, 1907, and continue eight months.

Four courses of lectures are required of all who matriculate as first-course students.

The courses are graded and cover Lectures, Recitations, Laboratory Work and Clinical Instruction.

The third and fourth year classes will receive their entire instruction at Portland, where excellent clinical facilities will be afforded at the Maine General Hospital.

For catalogue apply to

ALFRED MITCHELL, M. D., Dean.
BRUNSWICK, MAINE, July, 1907.

Goode & Driscoll's RESTAURANT

42 Central St. OPEN ALL NIGHT Bangor, Me.

Large Dining Room for
Banquets and Parties.

Cornell University Medical College,

NEW YORK CITY.

The course covering four years begins during the last week in September and continues until June.

A preliminary training in natural science is of great advantage. All the classes are divided into small sections for recitations, laboratory and clinical bedside instruction.

Students are admitted to advanced standing after passing the requisite examinations.

The successful completion of the first year in any College or University recognized by the Regents of the State of New York as maintaining a satisfactory standard is sufficient to satisfy the requirements for admission which have lately been raised.

The annual announcement giving full particulars will be mailed on application.
